| • White Frame (Satin Backlit Print)  |                        |

**BLEED AREA**  
The bleed area extends out 3mm from the edge of your finished artwork. All images or colours that are required to print to the edge of the document should be extended to avoid any sizing issues created during the print finishing process.

**VIEWABLE AREA**  
This is the finished size of your document. Anything placed outside this area will not be visible after placement within the frame of the backlit signage.

**FRAMING AREA**  
All content within this area is hidden within the frame of the backlit signage. All images or colours that are required to print to the edge of the viewable area should be extended to avoid the chance of any white lines to be visible during the print finishing process.

### HOW TO CREATE YOUR PRINT READY PDF

Please use the following instructions to create your PDF.

File > Export  
Format > Adobe PDF >  
Adobes PDF Preset > PDF/X-1a:2001 >  
Marks and Bleed >  
Select "crop marks"  
Set all "bleeds" to 3mm
